ACHIEVEMENTS

- Learning new technology
- Continuous learning
- Adaptability
- Leadership

PROJECTS

ItchyFeet [View Project](#)

Apr 2023 - Apr 2023

Features:

- A feature-rich, responsive, and user-friendly platform that can help people find and book tours from all over the world.

Tech Stack: React, CSS, MongoDB, Node, Express

Description: A fully functional platform for finding tours all over the world. Using MongoDB as our database, ReactJS and CSS for the frontend, and Express.js and Node.js for backend. Additionally, implementing Stripe for payment processing is a way to provide secure and streamlined payment experience for the users.

MynewsFeed 2.0 [View Project](#)

Mar 2023 - Mar 2023

Features:

- This is a **newsFeed** website its homepage consist two parts first is load new news and second is saved news. If we click on the load new news it shows the all the news
- It has very various sections related to the news like sports, science and politics if we click on particular category it will be provided related news for the particular category.
- We can read the complete news by the adding on the read more link if we click on this link we will read direct to the actual news website. if we click on the like button it will be saved to the local storage and it will be added to load save new section.
- Now we are in the save new section and we can see all the news we are liked and if we click on the heart button it will be remove from the local storage

Tech Stack: HTML, CSS, JavaScript

Description: The NewsFeed Project covers a wide range of topics, including global news, politics, technology, entertainment, sports, science, and more.
